Overview

Professional SMB Surveillance Solution

Our Professional SMB Surveillance Solution offers cutting-edge technology tailored to small and medium-sized businesses. High-resolution cameras, seamless network integration, user-friendly software, and robust data security provide comprehensive surveillance. It ensures compliance, scalability, and peace of mind, making it the ideal choice for safeguarding your business assets and operations.

### 32 channel network video input with dual HDMI 4K and Single VGA monitor support

Our 32-Channel Network Video Input with Dual HDMI and Single VGA Monitor Support empowers you with versatile surveillance capabilities. It accommodates thirty-two camera inputs, delivering a comprehensive view of your premises. Multiple monitor support enhances monitoring efficiency, allowing simultaneous viewing of multiple camera feeds. Gain better control and insights for enhanced security. The ANVR-32-4S also has 16-Ch Alarm Input and 4-Ch Alarm Out to further enhance your security. Use the ANVR-32-4S as a standalone device and control it using a mouse connected to the ANVR, Or when the device is connected to the network you can also use the Webui of the ANVR-32-4S to control and set it up.

Features

- 4K Recording and Playback, Live View.
- 32 Channel input
- 2x RJ-45 10/100/1000Mbps
- High-resolution cameras for crystal-clear imagery.
- Android/IOS App Support
- Robust network infrastructure for seamless streaming.
- User-friendly software with remote access.
- Supports 4x 3.5" SATA II x HDD
- 16-Ch Alarm Input / 4-Ch Alarm Output

- Compliance with privacy regulations.
- Support mainstream cameras of ONVIF conformance(Profile S, Profile G, Profile T) and RTSP protocols
- Support 2-ch HDMI, 1-ch VGA, HDMI at up to 4K(3840x2160) resolution
- HDMI and VGA simultaneous output

32 Channels IP camera Performing Real-time Remote Monitoring

Our 32-Channel IP Camera system enables real-time remote monitoring. With multiple camera inputs, it offers comprehensive surveillance coverage. You can remotely view live feeds in real-time, ensuring you stay connected to your premises anytime, anywhere. Secure your property and assets with responsive, high-quality video monitoring.

airlive®

NVR automatic intelligence Video Bandwidth Stream

Our NVR boasts automatic intelligent video bandwidth stream management. It dynamically optimizes video streams based on available bandwidth, ensuring seamless surveillance performance. This smart technology automatically adjusts video quality to maintain a stable connection, providing consistent, high-quality video feeds without manual intervention.

Enhanced Security and Efficiency: ANVR-32-4S's Intelligent Event Management

The ANVR-32-4S is armed with an intelligent alarm-triggering mechanism, bolstering security with support for diverse alerts and detection of abnormal events. In the realm of video surveillance systems, ensuring a rapid and responsive event management system is indispensable during critical situations. This sophisticated attribute substantially enhances the overall security and operational efficiency of Airlive NVR systems, ensuring that potential threats and events are promptly identified and addressed, ultimately fortifying the safety and effectiveness of the surveillance network.

Supports AI Security

The ANVR-32-4S supports the Smart AI camera functions from the AirLive AI camera family. Vehicle and Human body detection will also be shown in the ANVR and can be setup. Also, other Smart AI feature are shown in the ANVR like Intrusion Detection, Cross Line Detection, Enter Area, Leave Area, Defocus Detection, Scene Change Detection. These functions will be enabled when an AI camera with these features is added to ANVR. Giving you more control of your security from a central location.
