

**6-port Gigabit POE Switch, 802.3af/at, 65W**

**6-port Gigabit incl 4x30W PoE RJ-45, 2x1.25G SFP**

**POE-GSH402-65**

**802.3af/at  
30W**

**Gigabit  
SFP**

**Plug&Play**

**Extend Mode  
250m**

**Hardware  
VLAN**

## Overview

### 802.3af/at PoE Gigabit Switch, with 2x SFP Gigabit Uplink

The AirLive POE-GSH402-65 Gigabit switch is compliant with 802.3af(15W)/802.3at(30W). It supports 4 Gigabit PoE+ ports and 2 Gigabit SFP uplink ports. The total PoE power is 60W. The AirLive POE-GSH402-65 switch is a plug and play unmanaged PoE switch with VLAN and 250meter cabling extension, which can be easily set up via its DIP switch. The two Gigabit SFP Uplink ports help with connecting the switch to a larger network making it the most cost-efficient client switch for various applications at Home or Office. Connect several PoE devices to the switch, Access Points or normal IP cameras can connect to any of the PoE ports on the switch and be powered on up to max 30W (at).

## Features

- All 6-port, each port delivers Gigabit high speed .
- 4 x PoE port 10/100/1000Mbps (up to 30W).
- Extend the network with 2 x 1G SFP Uplink ports.
- PoE power, supports 802.3af/at PoE.
- Internal Power 65W, Max PoE budget 60W.
- VLAN Mode, Extended Mode: transmission of up to 250M in Extend Mode, setting by hardware DIP switch.

DIP Switch PoE Gigabit port Port 1~4: 30W Gigabit SFP Uplink

## VLAN Mode

VLAN mode: This additional feature gives the switch extra security for the users connected to it. The VLAN mode works as Port isolation, meaning that when it's enabled the users connected to the LAN ports cannot communicate with each other but only communicate with the UP-Link ports (port 5/6). This way there is an extra layer of security and data will not be shared between the users. This can be used in a small office to separated guests from the company network or in a home to separate tenants.

## Extend Mode

Extend mode: The POE-GSH402-65 switch can be set in Extend mode to reach a distance of up to 250m, this can be very useful in locations where it hard to get power to turn on your PD device. The Extend mode makes this easier. The Extend mode is only for Port 3 and 4 on the switch and when enabled the transmission rate will be 10Mbps.
